
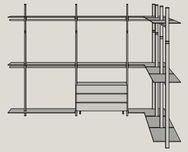
The patented extendo system, used as the load-bearing structure of the PERSONAL collection, consists of two extendable aluminium profiles, adjustable to different ceiling heights. By operating the concealed lever, the profiles lock at the desired height and are tensioned between floor and ceiling, without the use of tools or any prior fixing.



PERSONAL - design 2004

Il sistema brevettato extendo impiegato come ossatura portante della collezione PERSONAL è formato da due profili in alluminio estensibili, adattabili alle diverse altezze degli ambienti. Agendo sulla leva a scomparsa, i profili si bloccano all'altezza desiderata e si comprimono tra pavimento e soffitto, senza l'utilizzo di alcun utensile o prefissaggio.

Le système breveté extendo, utilisé comme ossature porteuse de la collection PERSONAL, se compose de deux profilés en aluminium extensibles, adaptables aux différentes hauteurs sous plafond. En actionnant le levier escamotable, les profilés se verrouillent à la hauteur souhaitée et se mettent en compression entre le sol et le plafond, sans aucun outil ni fixation préalable.

Das patentierte extendo-System, das als tragende Struktur der PERSONAL-Kollektion dient, besteht aus zwei ausziehbaren Aluminiumprofilen, die an unterschiedliche Raumhöhen angepasst werden können. Durch Betätigung des verdeckten Hebels werden die Profile in der gewünschten Höhe arretiert und zwischen Boden und Decke verspannt, ohne dass Werkzeuge oder eine vorherige Befestigung erforderlich sind.

El sistema patentado extendo, utilizado como estructura portante de la colección PERSONAL, está formado por dos perfiles de aluminio extensibles, adaptables a diferentes alturas de techo. Al accionar la palanca oculta, los perfiles se bloquean a la altura deseada y quedan comprimidos entre el suelo y el techo, sin necesidad de herramientas ni de fijación previa.
